Subject: SVEC Lighting & Lead/PCB Paint Remediation Docs
Attachments: SVEC Abatement - Paint and Light Removal.pdf; SVEC Paint & Light Removal Bid (07-19-2016).pdf; SVEC Lighting Proposal (July 2016).pdf

Here are documents related to the removal and installation of new light fixtures, and also the remediation of areas of lead and PCB containing coatings on the exterior of the structure.

- 1) Description and Location of Exterior Walkway and Lighting Project
- 2) NorthStar bid on above projects
- 3) Preliminary Lighting Replacement Doc

I do not yet have final contracts for these two items as they were just approved by my Board of Directors. However, they will be performed utilizing the same General Conditions and Form of Contract as were used with the PCB caulk abatement project . McKinstry is working up the final lighting replacement scope of work and documentation for our review and approval, but this is the preliminary work that they provided to seek board approval for the project.

John Mannix
Assistant Superintendent for Operations
